

Promoting Mental Health in Young Children

Handle with Care is a simple interactive program to help parents and caregivers, including those who work in early childhood settings, to promote the mental health of young children from birth to 6 years.

Handle with Care uses a strengths-based approach that assumes every parent and caregiver has problem-solving skills, potential resources, and wants what's best for the children in their lives. It is for anyone who cares for or works with children, including those in communities with particular risks or challenges. It recognizes the value of every parent, caregiver, and child.

The program is delivered in partnership with various agencies 2-3 times per year, sometimes in different locations.
